5:15 pm – 7:00 pm Sponsored by 	Networking Reception

WEDNESDAY, FEBRUARY 7, 2018

9:15 am – 12:00 pm	<p>Van Warmerdam Dairy Digester Project</p> <p>Van Warmerdam Dairy, in partnership with Sacramento Municipal Utility District (SMUD) and Maas Energy Works, has installed an on-site lagoon digester. The dairy has a 20-year power purchase agreement in place to sell the power it creates, along with its Renewable Energy Certificates, to the utility. Because it combusts the gas only when demand on the grid is highest, it allows the utility to balance the grid with consistent renewable power, whether or not the sun is shining or the wind blowing. The combined heat and power engine of the digester has a capacity of 600 kw and processes the waste from ~1000 dairy cattle.</p>
